WAR is a terrible thing.
WAR is one of mankind's worst behavior pattern.
WAR means nothing but pain, fear, destruction innocent lives and DEATH.

As long as political leaders, weapon dealers, lobbyists and warlords are shaking their bloody hands, as long as WAR means money, force and power, it is OUR duty to be and to act as PEACEkeepers.

We shall start our PEACEkeeping mission inside ourselves - in our family, our neighborhood, our communities - all over the world as good as we can. We shall raise and teach our children how to live in PEACE, harmony and freedom. They have to learn about giving, sharing and respecting one another, so that they are enabled to achieve PEACEful thinking, acting and living.

This may also include a more honest language where phrases are not redefined like "Civilian death" to "collateral damages" and being killed by your own Army is now called "friendly fire". („Television, The Drug Of The Nation", 1992, Disposable Heroes Of Hiphoprisy)

Although some of us seem to be blessed and are happy to live in PEACEful and free countries and communities, it will always be OUR duty to sharpen OUR consciousness, because seductions like jealousy, envy, greed and hate may easily sneak into OUR souls, hearts and minds. If we are strong enough to avoid and fight against all these negative and harmful influences in our personal life step by step, we can make the world a better place to live in.

"WAR what is it good for, absolutely nothing" 1969,
Norman Whitfield und Barrett Strong.
